

Just before he comes out of school. Light a lighter and then put it directly underneath his car door handle. Wait...Leave...Listen. When you hear a loud "shit!", you know he made it to his car in time. Remove his muffler and pour approximately 1 Cup of gas in it. Put the muffler back, then wait till their car starts. Then you have a cigarette lighter. A 30 foot long cigarette lighter. This one is effective, and any fool can do it. Remove the top air filter. That's it! Or a oldie but goodie: sugar in the gas tank. Stuff rags soaked in gas up the exhaust pipe. Then you wonder why your "friend" has trouble with his/her lungs. Here's one that takes time and many friends. Take his/her car then break into their house and reassemble it, in their living or bedroom. Phun eh? If you're into engines, say eeni mine moe and point to something and remove it. They wonder why something doesn't work. There are so many others, but the real good juicy ones come by thinking hard.

48. Ripping off Change Machines **by The Jolly Roger**

Have you ever seen one of those really big changer machines in airports Laundromats or arcades that dispense change when you put in your 1 or 5 dollar bill? Well then, here is an article for you.

1. Find the type of change machine that you slide in your bill length wise, not the type where you put the bill in a tray and then slide the tray in!!!
2. After finding the right machine, get a \$1 or \$5 bill. Start crumpling up into a ball. Then smooth out the bill, now it should have a very wrinkly surface.
3. Now the hard part. You must tear a notch in the bill on the left side about « inch below the little 1 dollar symbol (See Figure).
4. If you have done all of this right then take the bill and go out the machine. Put the bill in the machine and wait. What should happen is: when you put your bill in the machine it thinks everything is fine. When it gets to the part of the bill with the notch cut out, the machine will reject the bill and (if you have done it right) give you the change at the same time!!! So, you end up getting your bill back, plus the change!! It might take a little practice, but once you get the hang of it, you can get a lot of money!

\----Make notch here. About «" down from the 1.

49. Clear Box Plans **by The Jolly Roger**

The clear box is a new device which has just been invented that can be used throughout Canada and rural United States. The clear box works on "PostPay" payphones (fortress fones). Those are the payphones that don't require payment until after the connection is established. You pick up the fone, get a dial tone, dial your number, and then insert your money after the person answers. If you don't deposit the money then you can not speak to the person on the other end because your mouth piece is cut off but not the ear-piece. (obviously these phones are nice for free calls to weather or time or other such recordings). All you must do is to go to your nearby Radio Shack, or electronics store, and get a four-transistor amplifier and a telephone suction cup induction pick-up. The induction pick-up would be hooked up as it normally would to record a conversation, except that it would be plugged into the output of the amplifier and a microphone would be hooked to the input. So when the party that is being called answers, the caller could speak through the little microphone instead. His voice then goes through the amplifier and out the induction coil, and into the back of the receiver where it would then be broadcast through the phone lines and the other party would be able to hear the caller. The Clear Box thus 'clears up' the problem of not being heard. Luckily, the line will not be cut-off after a certain amount of time because it will wait forever for the coins to be put in. The biggest advantage for all of us about this new clear box is the fact that this type of payphone will most likely become very common. Due to a few things: 1st, it is a cheap way of getting the DTF, dial-tone-first service, 2nd, it doesn't require any special equipment, (for the phone company) This payphone will work on any phone line. Usually a payphone line is different, but this is a regular phone line and it is set up so the phone does all the charging, not the company.

50. CNA List **by The Jolly Roger**

NPA	TEL NUMBER	NPA	TEL NUMBER	NPA	TEL NUMBER
